Message From Chief Editor

Greetings from the National Kidney Foundation of Malaysia.

In this third quarterly issue, we witness the successful events that have been carried out by the various departments within the Foundation.

We, therefore, congratulate the departments concerned for the sacrifices and efforts they had put in to bring to fruition their activities.

Such activities can be successful when done in a proper manner. As seen, the 13th Patient Forum headed by the Welfare Department of the Foundation with the support of sponsors, exhibitors and other departments within NKF attracted more or less 300 participants.

Other activities like health screening in Alor Setar in conjunction with "Hari Penyayang" launched by the Sultanah Bahiyah Foundation and launching in Kota Bharu of the NKF Public Education Department (PED) Regional Unit drew large crowds.

All these revelations were of direct interest to the individuals as they touched on their well-being.

On the other hand, some of the success stories of other activities covered the more humane side of many parts especially as they were focused on helping the needy and poor in getting dialysis treatment. As a result, a substantial portion of the money donations came from individuals, while corporations too played their parts under their corporate social responsibility programmes.

We are indeed truly grateful to all including the government authorities in enabling us to continue to maintain if not better our means towards helping humanity.

With these, we wish everyone "Happy Reading."

Cheers.

Dr. Prasad Menon
Chief Editor.

NKF 13th Patient Forum In Kuantan, Pahang

On 16 July 2017, the National Kidney Foundation of Malaysia (NKF) held its 13th Patient Forum for the first time in Kuantan, Pahang since the Forum was first organized as an annual event in 2003.

The Forum acted as an educational and meaningful avenue for dialysis patients and their caregivers to get together to exchange experiences, knowledge and ideas.

Themed “Improving the Quality of Your Life”, the Forum attracted 300 participants where they were informed and updated on kidney diseases, what the numbers in their medical reports meant, healthy diet, how to improve survival in dialysis treatment, the benefits given by Social Security Organisation (PERKESO) to those who are insured, and how to live positive lives.

With Kuantan chosen as the site of the Forum, NKF aimed to benefit dialysis patients across Pahang, Terengganu and to an extent Kelantan to ensure that all patients, caregivers and members of the public have access to important information that helps them to enjoy a more meaningful quality of life.

Acting Chairman of the Patient Selection & Welfare Committee, National Kidney Foundation of Malaysia, Mr. Maniam Raman Chettiar in his speech mentioned, “This Forum has been organised by the National Kidney Foundation of Malaysia (NKF) for the knowledge and benefit of not only the dialysis patients and their caregivers, but also for the staff of government and private dialysis centres as well as voluntary organisations”.

In opening the Forum, Dato’ Norol Azali Bin Sulaiman, a Member of the Pahang State Executive Council-cum-Chairman of the Committee for Health, Human Resources and Special Tasks said, “This Forum serves as a landmark of commitment reflecting NKF’s constant focus to further aid kidney patients in Malaysia as well as to improve their lives.”

“It is also important for the general public to be aware of such a health hazard so as to prevent kidney-related diseases and move forward as healthier Malaysians.”

Held at the Hotel Grand Darul Makmur, the Forum featured three Nephrologists, a senior representative from PERKESO and a dietitian.

Attendees also had the opportunity to visit the PERKESO, Diabetes Malaysia and the NKF Public Education Department (PED) booths at the Forum to learn more about the products and services offered.

Meanwhile, every participant went home with door gifts sponsored by Fresenius Medical Care, Cymed Sdn. Bhd., B.Braun Medical Supplies Sdn. Bhd., Cotra Enterprises Sdn. Bhd. and NKF.

In a separate location on the Ground Floor of Melor Centre Stage, Berjaya Mega Mall, Kuantan, NKF LifeCheck, the NKF’s Mobile Health Screening Team, also carried out health screening for the public from 10.00 a.m. – 4.00 p.m. A total of 113 individuals were screened at the event.

NKF Organises the 14th Annual Dialysis Meeting (ADM) 2017

The National Kidney Foundation of Malaysia (NKF) is once again organising the Annual Dialysis Meeting (ADM) 2017. It will be held at the Hotel Istana, Kuala Lumpur, from 25-26 November 2017 with the theme “Setting the Right Direction – Holistic Approach of Management for ESRF in Malaysia”.

The patient-centred approach to dialysis care treats each patient respectfully as an individual and not as a condition to be treated. It provides demonstrable personal, clinical and organisational benefits. When health professionals, patients, families, managers and carers work together in partnership, the quality and safety of dialysis care rise and costs decrease.

It is the responsibility of all partners in the dialysis care system to embrace the patient-centred care approach and take action to achieve the vision of patient-centred care.

Seminar Fee (inclusive of 6% GST):

Early Bird Rate (Registration before: 25 September 2017)
Local Participants: RM450.00 per pax

Standard Rate (Registration after: 25 September 2017)
Local Participants: RM500.00 per pax

Registration

To register, please fill up the registration form and then email it to us at training@nkf.org.my OR fax it to 03-7960 2359

Mode of Payment

Cheque payable to : National Kidney Foundation of Malaysia

Cash Deposit to:

NKF's 2017 Organ Donation "#AmbilSerius"

To further stimulate the organ donation campaign for 2017, NKF has moved more towards the use of social media applications of Twitter, Instagram and Facebook to pitch to the younger and information technology savvy segment of the Malaysian population.

With this novelty approach via the hashtag "#AmbilSerius", it is envisaged that there will be a more pervasive dissemination of a clearer picture in bringing about awareness in the importance of organ donation and organ transplant amongst nearly 3 million social media users. Particular emphasis was vividly placed on getting the men in the street to consider seriously organ donation and transplantation.

The campaign involved the collaboration of university students with NKF in the production of a video which would be projected on the official social media of NKF and selected organisations. In turn, the video would encourage social media users to snap pictures of themselves in the most creative ways imaginable with the hashtags "#AmbilSerius". They would then share their pictures on their social media with the hashtags #AmbilSerius #DermaOrgan in their captions. On its part, NKF would monitor and compile every picture with the #AmbilSerius.

Comprising three phases over October 2017 to October 2018, the campaign kicked off with the first phase in the form a road show in September – October 2017 followed by the second in November 2017 – March 2018 overlapping World Kidney Day and the third, another road show in April – October 2018.

NKF would be monitoring and compiling the various pictures with the #AmbilSerius over the 3 phases of the campaign for display during the closing ceremony of the event when the winner with the most creative picture and caption would be selected. At that juncture a grand round-up to the event was to be made with collaboration between NKF with organisations like the Ministry of Health, mass media and cinemas to spread this campaign via their media channels. In so doing, the coverage for organ donation and transplantation would be spread far and wide within the Malaysian society.

With such an onslaught on the public to get their members to be more amenable towards saving and enriching lives with organ transplants, the less sophisticated methods of propagation involving flyers, posters, bunting exhibitions and talks would continue to be employed in potentially receptive public places such as community halls, residential areas, villages and places of worship.

Every conceivable concrete means was hence explored to breach the bubble impeding organ donation and transplantation.

NKF NATIONAL KIDNEY FOUNDATION MALAYSIA

ORGAN DONATION #AmbilSerius AWARENESS CAMPAIGN

HOW TO PARTICIPATE OUR CAMPAIGN :

- 1** Snap a picture of you with the hashtag **#AmbilSerius** base on your own creativity.
- 2** Upload your photo on the Social Media with the hashtag **#AmbilSerius #OrganDonation** as your captions

Prevention Is Better Than Cure

by Ms. Kher Pui Ling, NKF Dietitian

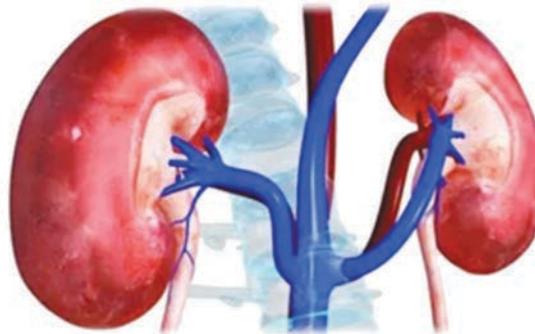

Chronic kidney disease (CKD) is a global public health problem¹. In 2013, CKD is one of the leading causes of mortality with approximately one million people dying each year globally². When CKD progresses to end stage renal disease (ESRD) or stage 5 CKD it is defined as kidney failure, wherein the condition requires renal replacement therapy (RRT) through either dialysis or kidney transplantation. In Malaysia, the incidence of newly diagnosed individuals with ESRD has increased two-fold over the past 10 years. The National Renal Registry has reported that approximately 7000 new patients are receiving continuous RRT each year³.

What do Your Kidneys Do?

Remove Waste and Extra Water from your body

Secretes erythropoietin which promotes production of Red Blood Cells which carry oxygen throughout your body

Keep Your Bones Healthy by activating the vitamin D that helps balance calcium and phosphorus

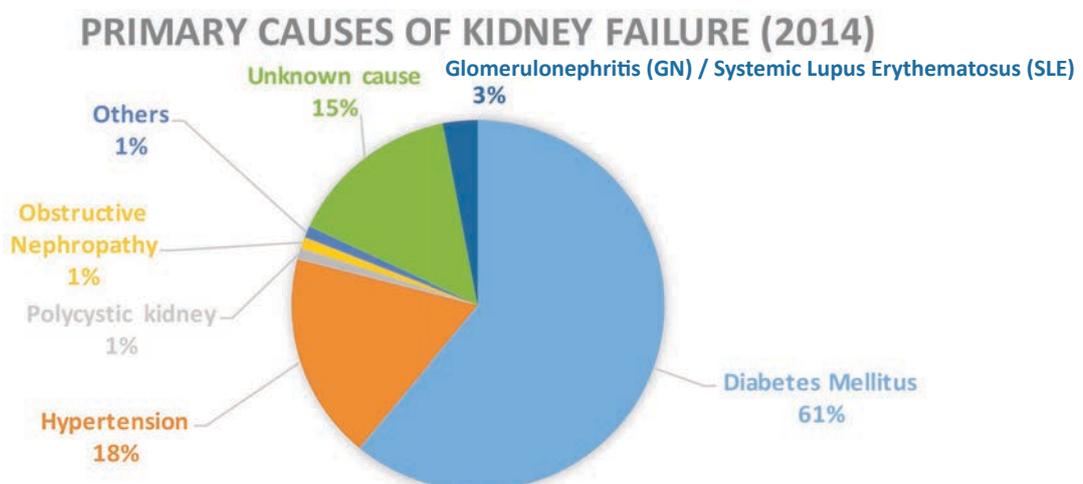

Control pH level by maintaining a healthy balance of the chemicals in your body

Regulate Your Blood Pressure by constricting and dilating your blood vessel

What causes CKD?

Diabetes and high blood pressure are the most common causes of kidney failure. Uncontrolled blood sugar level and blood pressure can damage the tiny blood vessels and filters within the kidneys.

In Malaysia, diabetes mellitus is listed as the primary cause of ESRD despite it being a preventable and treatable risk factor, which accounts for 61% of the total incidence.

Source: The National Renal Registry, Malaysia. 22nd Report of the Malaysian Dialysis and Transplant Registry 2014

What can You do to Protect Your Kidneys?

Maintain body weight in a healthy range. Obesity is one of the risk factors for CKD. Reaching and maintaining a healthy weight are important for overall health and can help you prevent and control many diseases and conditions, for example, diabetes and high blood pressure. It helps you lower your risk in developing these problems, helps you feel good about yourself, and gives you more energy to enjoy life. Your body mass index (BMI) is a helpful measure of whether you are having a healthy weight.

Be physically active every day. Exercise not only can help you to maintain a healthy weight, but also helps control blood pressure and cholesterol. At least 30 minutes of moderate intense physical activity of at least 5-6 days a week are preferable daily. When fitness improves, the intensity level of physical activity and the amount of time spent on physical activity can be gradually increased.

Eat healthy. CKD risk factors such as obesity, diabetes and high blood pressure are strongly influenced by dietary choice. Healthy eating plays an important role in kidney disease prevention; diet tips includes: 1) cut in sodium; 2) increased fruit and vegetable intake; 3) passing on processed foods and 4) lower intake of sugar.

Drink plenty of water daily. Drink 6-8 glasses of plain water every day. Consuming plenty of fluid helps the kidneys clear sodium, urea and toxins from the body.

Do not take over-the-counter pills on a regular basis. Your kidneys could be damaged if you take large amounts of over-the-counter medications, especially when the drug is not taken in accordance to your healthcare provider's instructions or if it is an illegal substance.

Get regular health check. Most people with early kidney disease do not have symptoms. If you are at risk of getting CKD regular blood and urine tests can reveal whether your kidneys are functioning properly. If kidney disease is discovered and treated early, regular blood and urine tests can check as to whether your kidneys are slowing down or even stopping from getting worse.

This page is dedicated to all the nurses who care for our patients.

NKF PED (Public Education Department) Regional Unit Launched In Kota Bharu

On 22 July 2017, the National Kidney Foundation Malaysia (NKF) officially launched its PED Regional Unit in Kota Bharu, Kelantan.

The unit had been set up in an effort to raise awareness on kidney disease and to facilitate early prevention and detection of the disease with the stationing of PED healthcare professionals to provide easily accessible information on the disease through health talks, health exhibitions and road shows in addition to carrying out mobile health screening.

About 300 people, including those from government departments and other institutions in Kelantan were at the official launch of the unit-cum-Hari Raya Aidilfitri Celebrations.

Launching the event was Dato' Dr. Ramli Bin Mamat, the Kelantan State Executive Council Member-cum-Chairman of the Committee for People's Welfare, Health, Environment and NGO.

Also at the launch was Mr. Maniam Raman Chettiar, a member of the NKF Board of Directors-cum-Acting Chairman of the NKF Patient Selection and Welfare Committee who mentioned, "As the regional unit is now in Kota Bharu, we hope to do our part towards increasing public awareness on kidney disease, organ donation and improving the quality of life for kidney patients here in the East Coast Region of Peninsular comprising Kelantan, Terengganu and Pahang".

In conjunction with the launch, various activities such as a colouring competition for children, a fruit preparation and a lucky draw were held to engage kidney patients and visitors to the launch.

At the same time, the Unit's LifeCheck Mobile Health Screening team led by Cik Irfah Binti Haji Mat carried out free health screening with the result that 84 persons were screened.

Besides being able to enjoy first-hand information from the Unit about kidney disease through health talks and exhibitions, the participants were informed that they could also secure information on CKD and the National Kidney Foundation Malaysia Kota Bharu Regional Unit by calling 09-7475813 or logging on to <http://www.nkf.org.my/>.

Health Screening At "Hari Penyayang" of the Sultanah Bahiyah Foundation

In conjunction with the carnival held on 18-21 May 2017 at the Darul Aman Stadium in Alor Setar for "Hari Penyayang" of the Sultanah Bahiyah Foundation (YSB), NKF's mobile health screening teams carried out free health screening.

The health screening was made available to the crowds thronging the carnival in line with NKF's maxim of bringing about early detection of kidney disease. It involved two health screening teams through the efforts of Mrs Alisa Ng, the co-ordinator from YSB.

One team was from the NKF PED (Public Education Department) Regional Unit based in Alor Setar, while the other, the NKF Elite LifeCheck Mobile Health Screening Team, travelled all the way from Petaling Jaya to Kedah.

Both teams carried out health screening at different parts of the carnival ground at the stadium from 9 in the morning to 6 in the evening on 19-20 May 2017.

Cik Noor Syuhada Bt. Haji Mat led the resident team with the Elite team headed by Cik Wan Saiduatul Achirah Bt. Wan Mahussinm.

Members of the public taking part in the screening were subject to tests for blood pressure, urine, blood glucose and body mass index, which were capped with counselling on what they need to do in the face of preliminary results from the health checks. For those found by the teams to be likely in the high risk group, that is, they were found to have high blood pressure readings and traces of sugar in their urine, they were advised to seek medical follow-ups with mainly government hospitals and clinics.

At the end of 19 May, 244 individuals were screened by the two teams with the local group and the Elite team screening 124 and 120 persons respectively. For 20 May, the local team screened 158 people with the other team checking on 155 persons, leading to a total of 313 individuals screened by the two teams for that day.

For their efforts in the two-day operations on 19 - 20 May, the NKF health screening teams screened 557 individuals with the Alor Setar-based team screening 282 persons and the Elite team 275.

Activities By the Public Education Department (PED) Regional Unit of Batu Pahat

In April 2017, the PED Southern Regional Unit based in Batu Pahat carried its activities at the “kampung” of “orang asli” for 5 days.

The unit led by Cik Malyana Bt Hatta operated at 3 “kampung” in Batu Pahat from 9.30 a.m. – 2.00 p.m. on 17, 19 and 20 April; 1 in Tangkak from 10 a.m. – 2.00 p.m. on 25 April and another in Muar from 10 a.m. – 2 p.m. on 26 April.

In Batu Pahat, the unit members carried out health screening and conducted talks on kidney disease in Bahasa Malaysia as well as its prevention at Kampung Orang Asli Sejangong on 17 April. It went on to repeat the 2 activities and even organised a colouring contest on 19 & 20 April respectively at Kampung Orang Asli Sri Pantai and Kampung Orang Asli Bumiputera Dalam.

At these “kampung” the Unit had the assistance of Puan Faziliana Bte Baken from Jabatan Kemajuan Orang Asli (JAKOA) of Batu Pahat who in acting as the co-ordinator for the Unit’s activities had to carry out much publicity of its services and arrange for the facilities for the Unit to operate.

Likewise, Encik Abdul Zaidi Bin Ibrahim of JAKOA of Muar/Ledang played the same role to facilitate the Unit’s operations at Kampung Orang Asli Mering, Tangkak and Kampung Orang Asli Sentosa, Muar.

With the screening dealing with tests in blood pressure, urine, glucose in urine and body mass indices, the Unit’s members capped these tests with counselling. Those who had undergone the tests were advised on what they would have to do based on the readings resulting from the tests. For those who had been found to have hypertension and traces of glucose in their urine, they were urged to seek further check-ups with government-run clinics and hospitals.

As a result of the health screening exercises on the various dates, 212 persons in the “Orang Asli kampung” had their health screened and below is the table giving a summary of the dates, “Orang Asli” settlements and number of people screened.

April (Time)	Place	No. of People Screened
17 (9.30 a.m. – 2 p.m.)	Kampung Orang Asli Sejangong, Batu Pahat	46
19 (9.30 a.m. – 2 p.m.)	Kampung Orang Asli Sri Pantai, Batu Pahat	53
20 (9.30 a.m. – 2 p.m.)	Kampung Orang Asli Bumiputera Dalam, Batu Pahat	23
25 (10.00 a.m. – 2 p.m.)	Kampung Orang Mering, Tangkak	45
26 (10.00 a.m. – 2 p.m.)	Kampung Orang Asli Sentosa, Muar	45
	Total	212

Exclusive Charity Dinner & Concert By Jeffrey Cheah Foundation In Aid of NKF

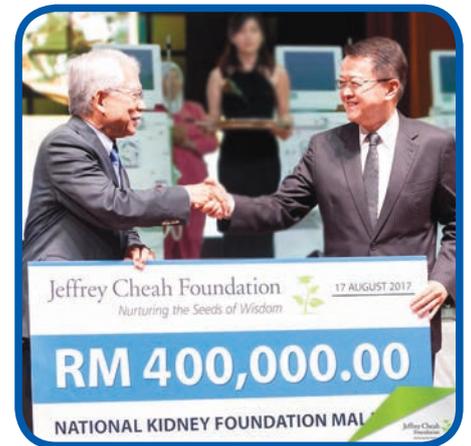

On 17 August 2017, Tan Sri Dato' Seri Dr. Jeffrey Cheah, AO, the Founding Trustee of the Jeffrey Cheah Foundation and Deputy President of the Board of Governors of the National Kidney Foundation (NKF) of Malaysia during a ceremony at the "Choral Serenade To Music" dinner and concert handed a mock cheque for RM400,000 to Tan Sri Dato' Dr. Abu Bakar Bin Suleiman, the President of the NKF Board of Governors.

The money was raised from the dinner-cum-concert hosted by the Jeffrey Cheah Foundation at the Sunway Resort Hotel and Spa.

The money was for the purchase of 8 dialysis machines that were greatly needed by NKF in its centres in Sabah, Sarawak and Selangor to provide haemodialysis treatment to poor and needy patients suffering from End Stage Renal Failure (ESRF).

As to the event, it showcased the Choir of Gonville & Caius College from the University of Cambridge who was accompanied by the Malaysian Philharmonic Orchestra. A repertoire of songs, including those of Mozart and Schubert, was performed.

In deference to Malaysian music, the choir performed local folk songs to the accompaniment on the piano by Tunku Zain Al-'Abidin Tuanku Muhriz who had also selected the compositions.

NKF expresses its profound gratitude to the Jeffrey Cheah Foundation.

Launch of the NKF Peritoneal Dialysis Funding Programme

On 20 August 2017 Dato' Dr. Zaki Morad Mohd Zaher, the Chairman of the NKF Board of Directors, formally launched the NKF Peritoneal Dialysis (PD) Funding Programme at the Kuala Lumpur Convention Centre (KLCC).

The launch was in conjunction with the 1st Asia Pacific (APAC) Conference On Acute Kidney Injury (AKI) and Continuous Renal Replacement Therapy (CRRT) and the 33rd Annual Congress of the Malaysian Society of Nephrology (MSN) which were also held at the same venue.

As explained by Dr. Lee Wan Tin, a member of the NKF Board of Directors during the launch, the NKF PD Funding Programme has been in operation since 2016. It is a scheme to provide monetary assistance to poor End Stage Renal Failure (ESRF) patients who opt to carry out PD in either the form of Continuous Ambulatory Peritoneal Dialysis (CAPD) or Ambulatory Peritoneal Dialysis (APD).

Patients intending to benefit from the programme will have to apply with either medical reports from the referring Consultant Nephrologists or referring medical institutions to the NKF Welfare Department which will interview them prior to decisions to either approve or reject their applications.

Since the programme entails that NKF guarantees payment for PD supplies for one year for each successful applicant, NKF will provide a formal undertaking to the company delivering the PD supplies to the home of the applicant. Invoices will then be raised by the company providing the PD supplies with NKF, which will verify them before making payments.

Following the programme, three major pharmaceutical companies, namely, Baxter Healthcare (Malaysia) Sdn Bhd, Fresenius Medical Care Malaysia Sdn. Bhd and Lucenxia (M) Sdn Bhd are participating in providing the PD supplies.

Prudential BSN Takaful Bhd Presented 4 Dialysis Machines To NKF

On 19 May 2017, Encik Khairuddin Affendi Mohamad, the Head of Microtakaful, Prudential BSN Takaful Bhd (PruBSN) in a ceremony at the NKF premises handed over 4 dialysis machines to the National Kidney Foundation (NKF) of Malaysia. On hand to receive the machines was Mr. Chua Hong Wee, the Chief Executive Officer of NKF who represented the Foundation. The ceremony was witnessed by the staff of the company and NKF.

The gift of the machines was to assist NKF in providing haemodialysis to poor and needy patients with End Stage Renal Failure (ESRF) seeking treatment at the centres of the Foundation.

Two machines were located to Pusat Dialisis NKF – Kuala Terengganu, with one to Pusat Dialisis NKF - Rotary Damansara (Batu Caves, Selangor) and another to Pusat Dialisis NKF – Yayasan Pembangunan Keluarga Darul Ta'zim (Johor Bahru).

NKF is truly grateful to PruBSN for the donation of the machines.

Inner Wheel District 330 Malaysia 2017 Donated A Dialysis Machine

On 17 July 2017, Madam Parimala Satheesan, the Immediate Past District Chairman of Inner Wheel District 330 Malaysia, at a ceremony at the NKF Secretariat presented a Nikkiso dialysis machine to Mr. Chua Hong Wee, the Chief Executive Officer of the National Kidney Foundation (NKF) of Malaysia. The function was witnessed by some members of the Inner Wheel District 330 Malaysia.

The Inner Wheel District 330 Malaysia, a non-governmental organisation (NGO), donated the machine to help NKF tie-over the haemodialysis treatment the Foundation provides to needy and poor patients suffering from End Stage Renal Failure (ESRF).

The machine was placed at Pusat Dialisis NKF-Yayasan Pembangunan Keluarga Darul Ta'zim (Johor Bahru) in Johor.

We would like to extend our sincere gratitude to the Inner Wheel District 330 Malaysia for the donation of the dialysis machine.

Musical Shower 2017 (Isaiyin Mazhaiyile 2017) Raised RM10,000 For NKF

On 18 July 2017, Mr. Sivaguru a/l Sithambaram, the Director of SCS Raagas Event Management, presented a cheque for RM10,000 to Mr. Chua Hong Wee, the Chief Executive Officer of the National Kidney Foundation (NKF) of Malaysia at the NKF Secretariat.

The amount was the proceeds from the much awaited musical show, Isaiyin Mazhaiyile 2017 (Musical Shower 2017), a charity concert which was organised by SCS Raagas Event Management in aid of 3 patients from Pusat Dialisis NKF-Good Health (Kampung Pandan, Kuala Lumpur) and was held at Dewan Wawasan, Menara PGRM in Cheras.

The concert was indeed a colorful night of performances by amongst others Sivaguru Sithambaram (TMS Fame), Sharmila Sivaguru, Ashok Kumar and Breetoe who rendered evergreen tunes of the 1960's, 70's and 80's.

NKF is truly appreciative of the gift from SCS Raagas Event Management, especially Mr. Sivaguru a/l Sithambaram.

Biaxis (M) Sdn. Bhd Provided Financial Assistance To Poor NKF Patients' Children

Biaxis (M) Sdn Bhd, a construction company in Subang Jaya had provided financial assistance to 20 school going children of poor patients dialysing at the centres of NKF under the Foundation's Children Education Welfare Fund that is managed by its Welfare Department.

Arising from the generosity and kindness of the company under its corporate social responsibility programme, Mr. Chua Hong Wee, the NKF Chief Executive Officer in representing

the Foundation paid a call at the office of Mr. Robin Ng, the Financial Controller of the company to express NKF's gratitude and to hand over a Certificate of Appreciation for the deed.

Direct Debit Donor Programme (DDDP) April - June 2017

Our sincere gratitude to all DDDP donors who have supported us through this programme. Your contribution gives hope and provides our patients a second chance to live.

We would also like to extend our appreciation to the following organizations for supporting us by providing complimentary booth space for our road shows from the months of April to June 2017.

1 Mont Kiara Mall, Kuala Lumpur	Hospital Sultanah Aminah, Johor
ABC Exhibition Services Sdn Bhd, Selangor	Hospital Teluk Intan, Pahang
