

JOIN HANDS FOR KIDNEY HEALTH

THE National Kidney Foundation of Malaysia and BookDoc, an online healthcare app with presence in Malaysia, Singapore and Hong Kong, are collaborating to offer kidney-related information and services to the public.

Under this collaboration, the public can search for the contact information of all NKF dialysis centres anytime via the BookDoc mobile app, available for free in both Apple App Store and Google Play Store.

In addition, users can apply to become NKF patients and navigate to the nearest centre through BookDoc's add-on features and embedded links.

Until June 30, those who download the BookDoc app and register as new user will be prompted to enter a special code. For each time that a new user keys in the word "kidney", RM1 will be donated to NKF.
