

Diabetes awareness programmes

SUNWAY Medical Centre celebrated World Diabetes Day for the fourth year running, as part of its five-year focus on creating diabetes awareness. This year's campaign themed Eliminate Diabetes is focused on diabetes-related kidney failure and sees the **National Kidney Foundation of Malaysia** as partner.

The campaign also comprises activities taking place until January next year, such as the 30 Days To Happy Kidneys; the Fit2Climb Challenge, a diabetics-focused extension of a holistic programme to address obesity in adults and children through healthy eating and lifestyle intervention and a series of Diabetes Self-Management Education programmes for diabetics and their caregivers.
