

HAEMODIALYSIS MACHINE

Grab users can convert rewards points into donations for NKF

KUALA LUMPUR: Following the successful campaign last year, Grab Malaysia and the National Kidney Foundation of Malaysia (NKF) are once again raising funds to purchase a dialysis machine for use by poor patients.

The collaboration between NKF, Malaysia's first non-governmental organisation to offer haemodialysis treatment, and Southeast Asia's leading on-demand transportation and mobile payment platform will enable users to convert GrabRewards points into donations to support NKF.

From April 12 to June 30, Grab

users in Malaysia can convert their GrabRewards points via the Grab app.

Chua Hong Wee

Every 600 GrabRewards points can be converted into a RM5 donation.

"We hope that bringing back this fundraising campaign will help to generate enough funding for a dialysis machine to support more End Stage Renal Failure patients," said NKF chief executive officer Chua Hong Wee.

NKF needs to raise RM24.9 million each year to subsidise the patients seeking treatments at the 28 NKF dialysis centres nationwide.
