

# TOWARDS BETTER KIDNEY DISEASE MANAGEMENT

THE second edition of Clinical Practice Guidelines on Management of Chronic Kidney Disease was launched through a collaboration between the Health Ministry, Malaysian Society of Nephrology and the National Kidney Foundation of Malaysia.

It is to assist in identification of risk, screening and early detection as well as early treatment to prevent progression, among others.

The launch, during the World Kidney Day, highlighted the increasing burden of kidney disease and the need for strategies for prevention and management on a national level.
