

# RUN FOR KIDNEY HEALTH

THE Malaysia Agro Exposition Park Serdang (MAEPS) was recently transformed into a zone radiating fun and excitement for the NKF Glow Run.

Taking on a carnival-like atmosphere in conjunction with the National Kidney Foundation of Malaysia's (NKF) 50th anniversary, the event featured, among other activities, a luminous 5km fun run that saw a route lined with neon lights. Over 3,000 participants celebrated life in an evening filled with laughter, sweat and exhilaration. The NKF Glow Run is aimed at promoting kidney health among young adults and increasing awareness of the prevalence of chronic kidney disease.
