

KIDNEY CARE

THE National Kidney Foundation of Malaysia held its 15th Annual Patient Forum recently, titled "Improving the Quality of Your Life".

NKF established the Patient Forum to give patients and caregivers information and advice that they need in one platform.

"Through this forum, we hope to safeguard the physical, emotional, and psychological well-being of patients," says Dr Lee Wan Tin, a member of NKF's board of directors. The forum featured five nephrologists and a dietician who shared vital information on kidney disease and managing it.
