

# Donate reward points for kidney patients' benefit

A TECHNOLOGY company is helping National Kidney Foundation (NKF) Malaysia to raise funds for the purchase of a dialysis machine.

Grab Malaysia users can donate their reward points to NKF and support the fundraising effort.

Until Dec 31, Grab users can convert their points into donations. Every 600 points will translate to a RM5 donation towards NKF.

“NKF is grateful to all Grab users who have generously donated to our fundraising campaigns over the past two years.

“Each dialysis machine has an average service span of eight years or 35,000 running hours.

“We hope to generate enough funding for a new dialysis machine to support more end stage renal failure patients,” said NKF chief executive officer Chua Hong Wee.

Grab Malaysia country marketing head Hassan Alsagoff said they were honoured to collaborate with NKF once again.

“This collaboration makes it even more accessible for Malaysians nationwide to make a difference and donate directly to the cause.

“The response from Grab users towards this initiative in previous years has truly been inspiring.”

Every year, NKF subsidises patients seeking dialysis treatment at 28 centres nationwide.
